

At Priestley, Greater Depth is all about giving the children the opportunity to 'master' their understanding of key concepts and ideas. So, when we talk about Greater Depth, we are talking about mastery of an objective, topic or subject

Greater Depth Geographers

Will show:

- **Independence** – Apply the skills and knowledge without the recall of the teacher e.g. making a conscious decision about how to present their learning.
- **Fluency**– Apply the skill and knowledge with a high level of confidence and show good resilience when the task seems demanding. Demonstrate greater fluency with world knowledge by drawing upon increasing breadth and depth of content and contexts.
- **Application** – Freedom of choice of how to apply the skill and knowledge to a range of different contexts, including other areas of the curriculum – Make greater sense of the world by organising and connecting information about people, places, processes and environments. E.g., have a fluent understanding of a range of countries where festivals take place and be able to discuss the country's characteristics.
- **Consistency** – Consistently use their skills, knowledge and understanding.
- **Link It** – Organise ideas to make connections with other areas of learning and new ideas. Making links to prior learning and other subjects e.g. Maths, reading and interpreting graphs.
- **Re-visit It** – Return to this aspect of learning after a break and still feel confident that they can work on the skill and knowledge without difficulty.
- **Explain It** – Able to explain their understanding to others and perhaps be a learning buddy to others. Be able to explain how to apply skills and be confident in leading their own fieldwork and investigations. Be passionate about their work and reflect confidently in their explanations, using specific and accurate vocabulary.

As teachers we will...

- Provide opportunities by offering a range of resources.
- Question, and challenge will be differentiated and open ended to extend thinking.

Greater Depth Learners in Geography will have a solid understanding of locational facts, as well as demonstrating an understanding of geographical processes; why places are the way they are and the impact of their surroundings. They will also be able to apply what they have learnt about current global issues and the effect this will have on the community and environment.

At Priestley, we believe children with SEND are those that have learning difficulties or disabilities that make it harder for them to learn than most children of the same age. These children may need extra or different help from that given to other children of the same age.

SEND Geographers

Will be able to:

- explore and achieve in line with their peers through being able to access a range of purposeful activities tailored to individual need.

As teachers we will...

- always set suitable learning challenges.
- modify the curriculum to remove barriers, so all pupils meet the same objectives.
- constantly review any possible environmental barriers to achievement such as sound, light & seating plans.
- show an awareness of pupils preferred learning styles
 - when teaching - visual, tactile, auditory and kinaesthetic approaches are used, such as supporting teacher talk with visual aids; using subtitled or audio-described film/video
 - for recording – alternatives to written recording are offered, e.g. drawing, scribing, word processing, mind maps, digital images, video, voice recording.
 - to promote security and aid organisation – e.g. visual timetables are used to show plans for the day or lesson; visual prompts for routines, such as how to ask for help; shared signals are developed so that pupils can convey their understanding, uncertainty or need for help.
 - For resources-ensure maps, atlases, artefacts and models are clearly labelled and accessible.
 - Provide pre-teaching opportunities to introduce new geographical vocabulary, concepts and/or processes for the upcoming lesson.
